Find your Deals Here

Space Saverr

Our mission is to bring the best deals at the *click* of a button. We are here to make your shopping experience quick and straight to the point.

Search & Save

Our mission is to bring the best deals to our users without the excessive searching

- Our simple and easy to use application is accessed by becoming apart of the Space Saverr team.

- Once a member the consumer can access the application by simply searching their product of choice.

- The consumer will be shown a series of available choices

- Once the consumer chooses the deal that suits them best, they can click the link and purchase their product.

Technologies used

- API's
- BootStrap
- CSS
- Express server
- HTML
- Javascript
- Jquery
- Mysql with Sequelize
- Node
- Passport

Successes

- Team handled debugging errors together which sped up our process of accomplishing our application.

- Found a working API that fit our application's goal.

- Got the database and routes to work accordingly.

Challenges

- API
- Implementing results to front-end
- Database

Directions for Future Development

- **Create point accumulation through purchases which can be used as a discount for select retailers or retain gift cards.**
- **Expand to feature digital coupons**
